Markmywords 1.10.1 Free download For Mac Best Genogram Maker for Mac - How to make a genogram on a Mac: Genogram is a diagram cum chart about a family, its history and relationships. Many professionals and students are required to make genogram drawings. You can make a genogram physically using a pen and paper. However, the pen and paper can create a limited genogram, and it takes more time to generate it. That's why we suggest finding the best genogram maker for Mac and creating a family chart on your Mac PC. To make a genogram on a paper, you need to have some drawing skills. On the other hand, there is no need to draw skills to create it on a computer. All you should know is how to use genogram software on Mac. In addition, the genogram charts created with software look clearer than paper genome. Here you will find full details of Genogram and list of Best Genogram Maker for Mac. What is Genogram? A genogram is an image of a person's family with relationships information and medical history. What is Genogram Maker? A program or software used to create genogram (family diagram) is known as Genogram Maker. Technology experts have developed Genogram Maker Software for Mac, iOS devices, Windows, Linux, Ubuntu, Android and other operating systems. Some genogram maker software is specifically designed for Mac OS. So you should have a Mac PC or MacBook (Air/Pro) or iMac to use the genogram maker. Best Mail Apps for Mac The importance of Genogram Maker Software Genogram Maker is very useful for professionals, students and other people. Because genogram is a pictorial view of a family

relationship as well as its medical history. We all know that the image is easier to understand than words written on a paper or website. Even low-educated people can easily understand genogram instead of information written as points or as paragraphs. Therefore, you need to get a genogram maker software for Mac to create as much as genogram projects you want. Who needs to use Genogram Maker? As per our best knowledge, genogram Maker is very useful for following categories of Psychiatrist AP Psychology Student Relationships Counselor Marriage and Family Therapist (MFT) Licensed Clinical Social Worker (LCSW) Cognitive Behavioral Therapy (CBT) The list of people mentioned above is necessary to create and use genogram regularly. Here we will give you some best genogram maker for Mac. 5 Best Mac Browser in 2019 Best Genogram Maker for Mac Genogram Maker Apps help you create some genogram with the least effort possible. When choosing a genogram maker software for Mac, you need to know about its features and ability. Here you will find the best genogram maker for mac as below: Edraw Max for Mac Genogram Analytics SmartDraw ProGeny Pedigree GenoProX Let's discuss each genogram maker for mac in detail to understand which one is right for you. 01. Edraw Max for Mac Edraw Max is a best Genogram Maker for Mac. It is developed by EdrawSoft and its available for Mac OS, Windows and Linux operating systems. Edraw Max App is able to create more than 260 types of drawings for a genogram. Whether you want to create genograms, flowcharts, infographics, gant charts, mind maps or anything, Edraw Max will make it easier for you. You can download trial on Mac and use it for free. If you like it, then buy the licensed version called Edraw Max Pro for Mac @ \$245 and enjoy all the features for life. Features of Edraw Max It has built-in genogram templates that save time. For example: You want to create a medial genogram for a family. So you need to make a family tree, add symbols and arrange the members in genetic order. Here you can use Edraw Max Template which provides your easy-to-use template to make the medical genogram faster and easier than ever. It has a library of complete genogram symbols. So you can add the symbols from the library to your genogram. These symbols are useful for showing family relationships, emotional status and medical situation according to the requirements of your genogram. It comes with an easy-to-use user interface (UI). When you first start Edraw Max on your Mac, you won't feel unfamiliar. Because the user interface is similar to Office Word App on Mac, that is, Home, Insert, Page Layout, and other options. Sharing is must for any genogram maker. Edraw Max offers various sharing options such as .png, .jpg, .html, .svg, .pdf, .word, and .ppt. Once the genogram is created in Edraw Max, you can edit it easily in Word, Excel, and DPI applications. 02. Genogram Analytics Genogram Analytics is a simple but powerful genogram maker software. It helps you create genogram that shows inheritance, interpersonal relationships, profession, diseases and much more. The easy-to-use genogram analytics interface makes it easy for everyone to create all types of genograms without any problems. There are two options to buy Genogram Analytics, you can buy Student Version (1 year @ \$39 or 2 years @ \$54) if you are a student or select Professional Version @ \$195 if you are a professional. Features of Genogram It comes with the Snapshot in Time feature. You can view any genogram by selecting the date on Genogram Analytics. For example: You created a genogram last year, and recently you created the same family's genogram. So the snapshot feature lets you see the changes happened in family dynamics in one year. It protects the confidential data you've stored in the genogram app. No one can see or have unauthorized access to the important and personal data stored in the form of genogram. It provides features to show complex family situations such as mixed families, multiple partners, divorces, same-sex relationships and alternative living conditions such as live-in-relationship. It allows to create charts as efficiently as improving the productivity of students, researchers and therapists. It has many predefined attributes such as income, inheritance, occupation and education. In addition, you are free to create unlimited attributed genograms, such as relationship status, behavior, mood patterns, and others. 03. SmartDraw SmartDraw is one of the advanced genogram maker. You can create a genogram online on the SmartDraw website and also download SmartDraw software on your Mac. It has a built-in genogram starter template that already includes regular family members. SmartDraw is available to purchase @\$297 for Single User Lifetime with no monthly/annual fees. You can create any type of genogram using SmartDraw features, libraries, and ready-to-use templates. The smartdraw smartdraw software features have automatic tools to help you keep all elements of a family research chart aligned and organized. As a result, your genogram will seem perfect and easy to understand for the viewer. It has intelligent formatting feature that allows you to create and edit various genogram projects for a limited time. SmartDraw's smart integration lets you easily export a genogram to Office, G Suite, Box, OneDrive, Dropbox, and Google Drive. It provides easy and fast link sharing service. You can send your genogram project link to your colleague and s/he can see it online without creating an account. It is actually a smart genogram maker with 34000+ Symbols, 4500+ Templates and 70 different chart types in a software. 04. Features of ProGeny Pedigree It allows you to create unlimited pedigrees (family trees) by drawing or using the automatically generated option in the ProGeny Online Pedigree Tool. It gives you individual Attributes. You can use and modify the attributes in each genogram. You can customize each pedigree on ProGeny by choosing the look and adjusting the size and space. It allows you to save genogram as image on your Mac PC. It provides the best printing options for your genogram that also includes Fit to Page and other custom specifications. 05. GenoProX GenoProX is a genogram maker software for Mac and mobile devices. Currently, GenoPro is available for the Windows operating system, but the developers have started working with GenoProX. The upcoming software will work on Mac PC, MacBook and some mobile devices. GenoProX will have all the amazing features that GenoPro has, and it will also get some advanced features that will take your genogram to create experience to the next level. GenoProX will be free if you want it on One Mac with the 'View Only' feature. However, the premium version will remain up to date and have additional features for creating/editing genogram projects. You can give \$25 to GenoPro Developers as part of Crowdfunding. In return, you will get your \$105 GenoProX membership when GenoProX will be released officially. The features of GenoProX GenoProX are a family tree and genogram creation tool. It offers premium subscription and one-time purchase options. You can draw, view, and generate any genogram project in the GenoProX app on your Mac using templates, symbols, and other features. With GenoProX software, you get 5 GB of secure encrypted storage. Your data is stored in a private secure server. It allows you to store medical data and documents in the Health Journal. GenoProX also offers GenoShare memberships that include private text, voice and video chat with any member of your platform. What is iGenogram? Can I use it on my Mac? iGenogram is a genogram maker app developed by iLogoTec Company. iGenogram App has many amazing features that are useful for creating a beautiful genogram. But this application is designed for iOS devices only. That means you can use iGenogram on iPhone, iPad and iPod Touch, but not on Mac. However, iLogoTec has mentioned on its website that they are in the process of developing iGenogram App for Mac. So not now, but you will be able to install and use iGenogram App on Mac PC and MacBook. Final opinion: All of the above apps are great for creating genogram on Mac. You can choose one app of the top five apps we've shared here. You'll need to analyze your claim in a genogram maker to get to know which software is right for you. You.
